Work out the net that you would need to make a hexagonal prism and an octagonal prism and construct them out of card. Think about the tabs that you will need in order to stick your shape together. Write how many faces, edges and vertices each of the two shapes has on the back of this sheet.

In addition you may also wish to...

I can add several 2-digit and 3-digit numbers using columns

I can subtract pairs of numbers by counting on along a number line

Spellings (for January 20th) this week we are exploring the wa wo ss letter strings

16

Rules

wa - often makes a long flat 'a' sound. Short **a** is uncommon. **swa** is a common string. No examples at the ends of words.

wo - vast majority of examples with **wo** at the beginning; *two* is the only example with **wo** ending. **swo** is about the only string which places it in the middle of words unless you count compound words such as *waxworks* or *roadworthy*.

ss - common at the end of words because of the **ness** and **less** suffixes, but note it changes to a 'sh' sound when you add an **ion** or **ian** ending, e.g. *discuss/discussion*. No words begin with **ss**.

List 1		List 2		List 3		Challenge List
