

## Multiplication

Find out how much milk each herd of cows will produce by multiplying the amount of milk by the number of cows

1. Each cow produces 45 litres - so the question would be  $45 \times 34 =$

2. Each cow produces 54 litres

3. Each cow produces 146 litres

4. Each cow produces 275 litres

5. Each cow produces 118 litres
